[Attachment A - List 176 Wells.pdf](#)
[Attachment C - 2 wells not on list of 176.pdf](#)

Jim, Please print out a copy of each of these tables and distribute to David, Lisa, Mike and me.
Thanks!

Subject: FW: 176 wells

Here are tables from DOGGR. It appears that 31 from the original 176 are subject to the Oct 15th deadline (12 of these are listed as idle). In addition, there are 2 wells (in D2 – Ventura) that were not on the original list of 176, but have been determined to be injecting into a sub-3000 and are subject to the Oct 15th deadline. Total wells shut-in due to the deadline is 33 (21 active).

There are imperfections in the tables. I've put a message in to Rob asking why some of the 31 wells are marked neither idle nor possible shut-in, and noting that if a well is not coded as idle, then we would presume it to be active and shutting in today.

I imagine we will have other questions that we can discuss with them tomorrow (unless we need to address them today).

Thanks,
David

David:

Attached are lists of wells you will be receiving later today with a letter. Attachment A includes all the 176 wells. Attachment B is just the list of wells that are required to be shut-in, and Attachment C are two wells that were originally on the list of wells that had a water quality between 3,000 and 10,000 but have now been determined to be below 3,000 and are now also required to shut-in.

Thanks,

Rob

Hi Rob,

Per your message yesterday about final disposition of the 176 wells, I'm wondering if you have the updated table. Of most interest, of course, are the wells that are subject to today's shut-in deadline. Thanks, David
